

LIGHTING UP THE WORLD OF FACILITIES MANAGEMENT

LEBANON

## ENVIRONMENTAL POLICY

In terms of the Environment LYNX is fully committed to continually strive to minimize the environmental impact caused by our employees or others in carrying out our works by controlling waste, preventing pollution, using energy efficiently, complying with legal regulations, and acting as good neighbours. In order to ensure the above, LYNX's top management sets environmental objectives and targets every six months with specific steps for achieving them, which are relayed in a Memo to all LYNX staff, and are reviewed at monthly management review meetings. Top management also carries out spot checks on random projects at least once a quarter and introduces corrective / preventive action where improvement is required.
